Job Role: Sr. Laravel Developer

As a Senior PHP Software Engineer, you will play a pivotal role in the development and enhancement of our performance marketing platform. We are passionate about technology and in our development we follow a cloud-native approach, leveraging AWS services, whilst using tools from the Atlassian product suite, and GitLab for our development and deployment processes. In this role, you will have the opportunity to make a significant impact by designing and implementing solutions that drive the success of our platform.

Requirements :

PHP Expertise: You should be well-versed in PHP, with a deep understanding of modern PHP best practices
Basic front-end skills: You need to be able and willing to make small adjustments to the front-end (html, javascript and css) using Laravel LiveWire and / or blade templates.
Relational Databases: Proficiency in working with relational databases is crucial for data management and performance optimization.
Docker: We use Docker extensively for containerization. Experience with Docker is required.
Apply Architectural Best Practices: We value architectural excellence. You should be skilled in applying best practices to ensure the
scalability, reliability, and maintainability of our software.
Domain-Driven Design: Familiarity with Domain-Driven Design (DDD) principles is highly beneficial, as our platform deals with complex
domain models
Laravel Framework: Mastery of the Laravel framework is a must. You will be responsible for developing and maintaining critical
components of our platform using Laravel.
Agile team mindset: Experience working in multidisciplinary scrum teams, actually using the scrum methodology.

What are you bringing?
Experience with Livewire: If you have experience with Laravel Livewire, you'll be able to contribute to our real-time UI components
effectively
Aiming for Full Test-Coverage: We take software quality seriously. A commitment to achieving full test coverage (also at the front-end)
is highly appreciated.
Elasticsearch: Experience with Elasticsearch is a plus, as it plays a vital role in our data retrieval and search functionalities and
features.
Basic DevOps Experience: While not a primary requirement, basic DevOps experience will be valuable as it allows you to participate in
the end-to-end development and deployment process.
Speaks good English
Has experience with the following software: Atlassian Jira, Github/Bitbucket/Gitlab
Domain knowledge in affiliate marketing

What is working at EE like?
Eastern Enterprise is a technology services company offering expertise in building a robust integration ecosystem, thus ensuring critical business continuity for almost 2 decades now. We have a team size of 350+ employees dedicated to serving over 100 clients in their digital transformation journey. Our deep industry expertise puts us in a unique position to help use the right technology to address the most complex and critical challenges—whether it's through faster cloud migration, getting the most

value out of the top technology platforms, making the most of your data through applied intelligence, or underpinning everything you do with security.

Our Indo-Dutch culture is unique. We value our people, encourage their development, & reward their performance. Continuous development of our employees is important & we believe "The heart and soul of Eastern Enterprise are Our People".

At Eastern Enterprise, your tomorrow starts today.

What we offer:

We offer you a chance to be part of a truly amazing journey in a company that sets very high targets and works hard to achieve them. You will be able to work with smart, motivated, and engaged co-workers from all over the world, in an intense and very energetic environment. This leads to you having a tangible impact on the way that we operate and expand our business.

Strong technical culture of continuous innovation and improvement

Flexible festive holidays, swap days off according to your values and beliefs

Work at one of our hub city offices or even remotely

Freedom to be yourself, and express your own ideas in a safe way

Much appreciation and an attractive salary

Legendary parties, fun team outings

A challenging position & a chance to work with motivated project managers and developers

Attention and time for your professional and personal growth

We encourage the free exchange of ideas, respect for differences, and well-being in the workplace for everyone. Passionate people are EE's Ace of Spades.

Whether you join us as a recent graduate or a seasoned professional, you'll get the opportunity to work on challenging projects from day one
